

Pickaway County Auditor/GIS Department

124 W Franklin Street

Circleville, Ohio 43113

https://www.pickaway.org/GIS_files/GIS.htm

What is GIS (*geographic information system*)? The Science of Where.

Who are We? A small county department under the Auditor's Office funded by the County Auditor, Commissioners and Engineer located in with County Building Department.

Who do we work with?

- Auditor's Office
- EMA/911 Office
- Board of Elections
- Engineer's Office
- Planning Department – Zoning Maps
- Commissioners' Office
- Pickaway County Sheriff's Office
- Other County Offices
- Local Schools
- Local Fire Departments & Emergency Services
- Pickaway County Townships
- Pickaway County Villages
- City of Circleville
- Pickaway Progress Partnership (P3)
- Businesses
- The General Public
- And numerous others

What do we do? Our office maintains all related GIS information and aerial imagery for the county. We are responsible for updating the address points and road centerlines within our mapping system. We have working relationships with all county entities in establishing a county wide enterprise GIS platform through desktops and online mapping services. We also manage the mapping contracts with ESRI, DDTI and Eagleview. GIS personnel collect, create, edit, operate, maintain, analyze, distribute, and plot simple and complex GIS/GPS data. We support all levels of government, citizens & businesses within Pickaway County with GIS services

Benefits of GIS

- Better 911 mapping services
- Increased economic and community development in the county.
- Enhanced services to county departments.
- Improved and enhanced service services to the citizens of Pickaway County.
- Government Transparency.
- Cost savings in improved workflows.
- Improved emergency related services.
- Providing the best and most up-to-date information for example aerial imagery.

What is aerial imagery and benefits:

Aerial imagery are pictures and videos taken from an aerial perspective. The benefit of aerial imagery would include those listed above for GIS, but would also provide benefit to farmers, marketing your business or property, development planning, emergency planning & services, tracking changes, law enforcement, swat raid planning, water & sewer, 911 services, real estate appraisal, etc.
