Ditch Work in 2018
In 2018 as part of our ditch maintenance program we finished spreading spoils on Congo Ditch. This concluded the work to bring Congo Ditch back to very good condition.

PCE crews finished spreading all the spoils and replaced all tile outs on Metzger/Ewing/Johnson. Crews also removed a failing 36" culvert crossing and installed a low-level crossing on Metzger/Ewing/Johnson.

On the Hughes Upper Terminus, we replaced several tile outlets on various properties that were either damaged or rusted out causing erosion.

PCE crews began cleaning the sit out of Greenbriar Ditch. We also installed two new crossing pipes at the upper end of Greenbriar Ditch to give us access to the area between the ditch and the State right-of-way fence.

Still on the Agenda
As weather permits this season, Pickaway County Engineer crews will work on cleaning and miscellaneous repairs to the following maintenance ditches:

- Dry Run Ditch – Cleaning bottom back to original grade.
- Bulen/Bulen Ditch – Cleaning back to original grade in late fall.
- Greenbriar Ditch – Replacement of tile outlets, spread spoils and reseeding.
- Mowing and spraying of woody vegetation on all County Maintenance Ditches.

The costs of postage and printing this newsletter are part of the Ditch Assessments. If you would like lower those costs by receiving this Annual Newsletter via Email, contact Jenny Griffin at 740-474-3360 or jgriffin@pickawayengineer.org

2018 Ditch Mowing
All of the Pickaway County Maintenance Ditches were mowed twice in 2018. The first mow was in late May/early June and then again in late September/ early October.
